Empower Tomorrow's Leaders with Nexis Uni® Today

The digital era challenges universities to support teaching, researching and learning in powerful new ways.

On-campus and off. In-person and virtual. All without sacrificing academic quality. Providing students and faculty with the right online research platform, one designed with student researchers' needs in mind, can help you do just that. **Meet Nexis Uni®.**

Used by universities and academic institutions worldwide, Nexis Uni gives your researchers access to an unrivaled content database and simple yet powerful search capabilities—anytime, anywhere.

> "
> The breadth and depth of coverage in.. Nexis Uni is the key reason it is such a valuable resource for my students and faculty."

Unrivaled content for academic researchers across all majors & disciplines

Advancing media and data literacy is a must-have in today's data-driven world. Not only do you need to help students navigate a constant onslaught of information to identify reputable sources; you also need to provide them with the tools to uncover insights from the data. Nexis Uni enables you to do both.

More than that, Nexis Uni helps you set your students up for success by offering access to the same LexisNexis® content that governments, companies, law firms and other organizations worldwide rely on. This comprehensive collection of content can be used across disciplines, enabling students to find relevant, timely sources for a wide variety of projects and research. No jumping from one database to another to track down information. What's included?
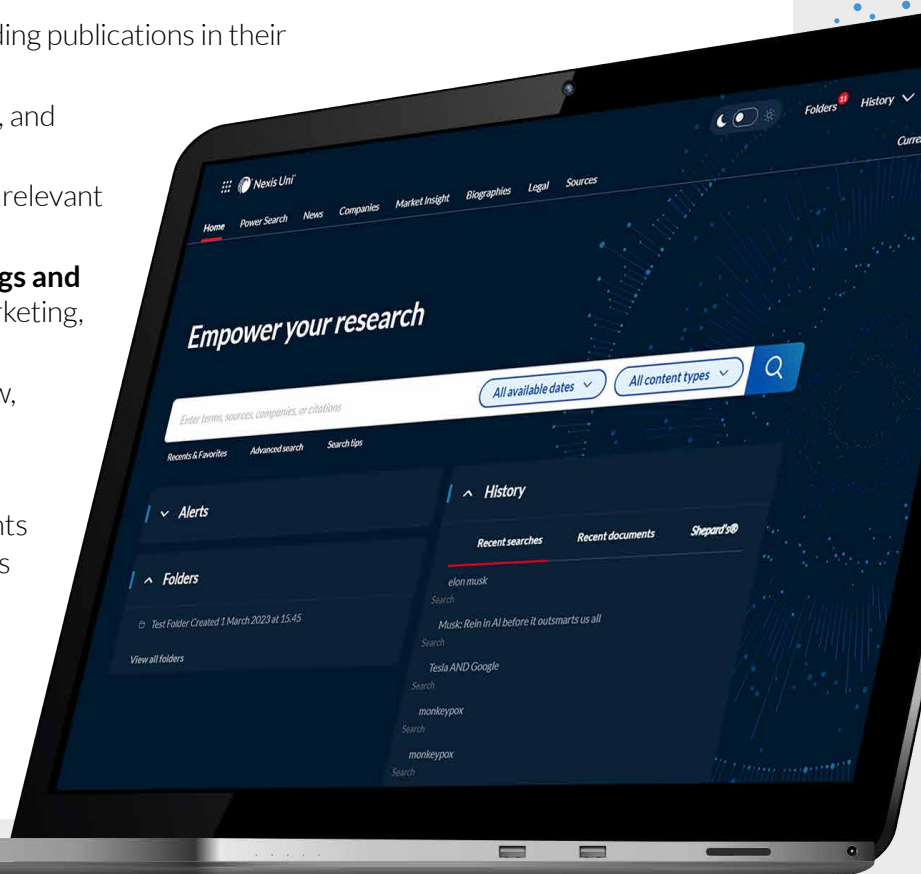

MORE THAN 15,000 NEWS, BUSINESS, AND LEGAL SOURCES

Whether your students need access to the latest news or want to dig deeper, Nexis Uni makes it possible. Our content includes news publishers from around the world including the BBC World Service. In addition, the Nexis Uni database features an archive that goes back 45+ years for some publications like *The New York Times.* Such deep media coverage is ideal for journalism, political science, data science students and more.

News sources like these support research on current and historical events, government policies, companies and people for wide variety of projects and papers. Plus, with all of the sources in one place, Nexis Uni is both more cost effective and more efficient than subscriptions to multiple databases. Students gain access to premium content that would typically reside behind paywalls.

- **Newspapers** from around the world, including publications in their native languages
- **Broadcast news transcripts** from radio, tv, and congressional committee hearings
- **General, industry and trade publications** relevant to a variety of industries and disciplines
- **Newswires, websites, thought leader blogs and social commentary** covering business, marketing, sports, entertainment, politics and more
- **Legal news** covering banking, corporate law, intellectual property, real estate and more

Having such a comprehensive collection of sources at their fingertips also enables students to fact check across multiple sources to assess the credibility of the information. This is an important step in media literacy, a critical skill given the amount of misinformation and disinformation circulating today.

EXPLORE BEYOND BUSINESS NEWS

Complementing our business news is a comprehensive set of connected Nexis Solutions within Nexis Uni that can take business research further.

Nexis Dossier is the same tool that organizations around the world use for information on 280+ million companies in both developed and emerging markets. Students can review profiles of companies and the executives that run them along with:

- Annual reports
- SEC filings
- Corporate affiliations
- Merger and acquisition transactions
- Earnings information
- Bankruptcy reports

CSRhub ESG Ratings have been included in Nexis Uni in response to increased interest around environmental, social and governance (ESG) performance. Covering nearly 30,000 companies, the ratings are determined by analyzing aggregated data from SRI analysis firms, 600+ government agencies, nongovernmental agencies, news feeds and more.

Nexis TotalPatent One gives Nexis Uni users a flexible and powerful patent search engine for their projects and research. Students can download full patent files and visualize family relations between patents and claims.
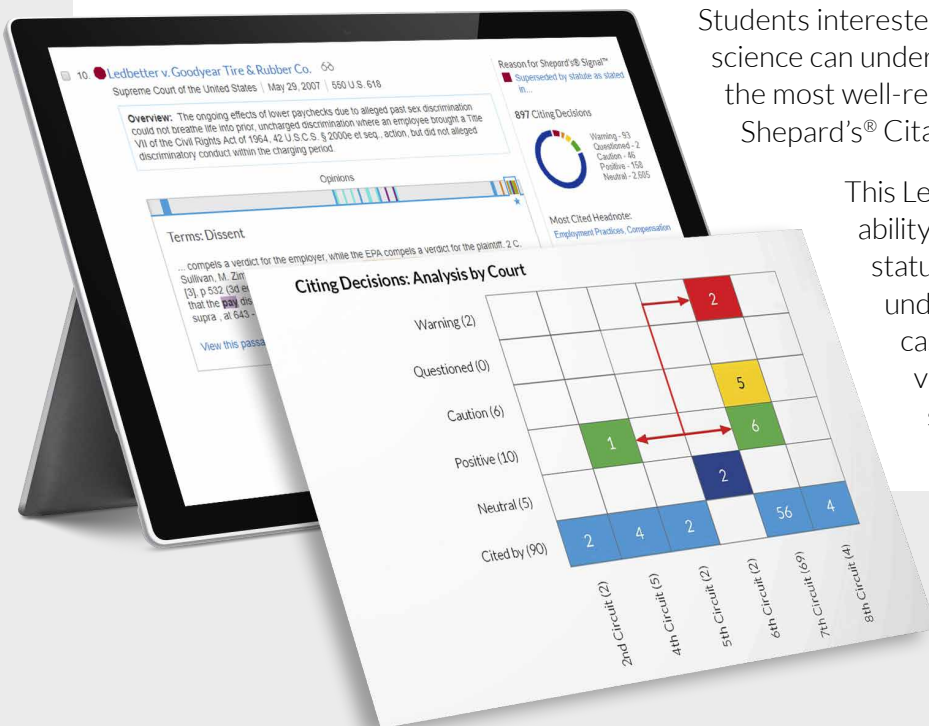

DIVE INTO LEGAL INFORMATION

Legal news is just a fraction of the legal data available. Nexis Uni features legal information relied on by legal professionals everywhere.

- Decided court cases—civil and criminal—from state, federal and international courts, including U.S. Supreme Court case decisions going back to 1790
- Jury verdicts and settlements for U.S. civil cases
- Nearly 1,000 law reviews, bar journals, ABA journals, legal newspapers, legal newsletters and specialty legal publications that explain complex legal matters in plain language
- Agency decisions that deliver insights into organizations that run afoul of anti-bribery and corruption laws and other legal or ethical issues associated with ESG factors

Students interested in law, journalism, and political science can undertake research with ease, using one of the most well-recognized citation tools the legal field: Shepard's® Citations.

This LexisNexis exclusive gives students the ability to visually track judicial decisions, statutes and other legal resources to understand how courts have treated a case over time. Annotations and data visualizations help researchers quickly see on-point issues and citing trends.

NEW ACADEMIC JOURNALS

The content available in Nexis Uni continues to expand to meet academic research needs with the addition of over 300 Springer Nature academic journals, including:

- Business & Information Systems Engineering
- Communications Earth & Environment

- Journal of International Business Policy
- Molecular Psychiatry
- Nature Sustainability

- npj Urban Sustainability
- npj Mental Health Research
- Schmalenbach Journal of Business Research

With titles spanning Life Sciences, Political Science and International Relations, Medicine and Public Health, and Business and Management, these scholarly journals are ideal sources for students to undertake cross-disciplinary research and find peer-to-peer citations.

Bottom line: You would need to subscribe to 4-5 different databases to meet the volume of content available from Nexis Uni, making it a powerful resource for your users and an economical option for your budget.

Enabling research without restrictions

Nexis Uni features a streamlined search experience that digital natives expect and digital novices appreciate. Easily accessed using automated, IP authenticated sign-in from anywhere in the world, Nexis Uni levels the playing field for students, whether on-campus or off.

Ideal for novice and experienced researchers alike, the easy-to-navigate research platform features a centralized search box capable of both natural language search or more complex Boolean queries across the entire content collection. Other user-friendly features include:

- **Automated data visualizations** to easily identify new insights and trends from search results with a variety of graphs and charts.

- **Content summarization** helps students quickly evaluate large volumes of documents during research to identify those that could contribute to their project.

- **Content enrichments** like index terms and metadata enable powerful results filtering.
- **Citation tool** allows students to add proper citations in APA, Bluebook, Chicago, and MLA formats to papers and projects in a click.

With the option to create individual user profiles, students can create folders, save searches to rerun later, set up Alerts to stay up to date with topics of interest, and more.

Built-in collaboration tools enable students to work together efficiently wherever they are. They can annotate documents with highlights or notes and add them to shareable folders when tackling team projects or study groups. Faculty benefits as well, gaining clear visibility into student activities in shared "required reading" folders.

Features that deliver value for librarians

While Nexis Uni is designed to meet student research needs, it comes with benefits for librarians too.

Certification Courses for Nexis Uni are available on-demand to help your novice researchers easily learn the basics of using Nexis Uni for research.
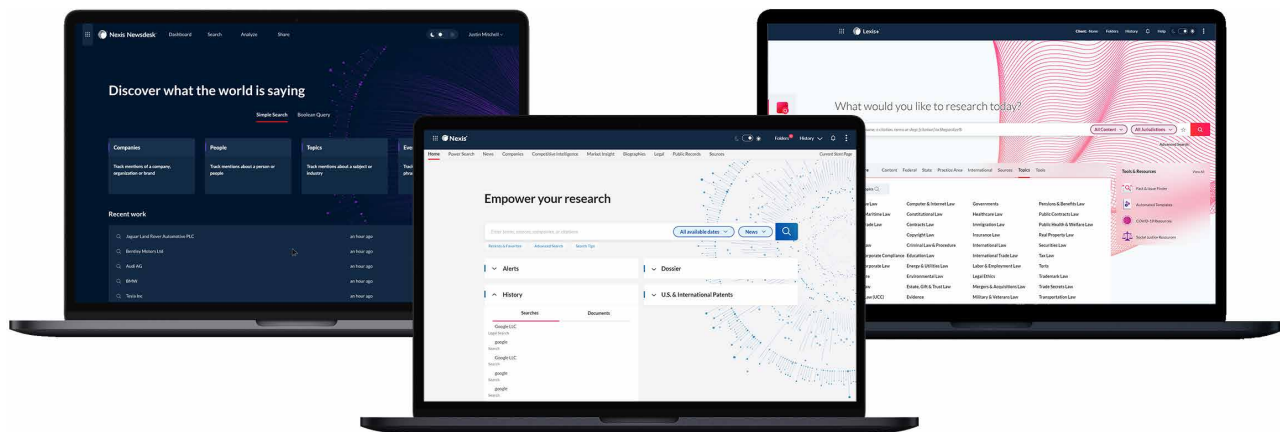

Self-service set-up of User IDs and Passwords means you spend less time managing registration requests.

Simple navigation is further supported by extensive self-service training resources like our webinars and how-to videos, reducing the time you need to spend showing students the basics.

We continue to evolve to meet students needs, now and in the future, with our Nexis Student Pathways initiative. Nexis Uni offers a search experience similar to other LexisNexis solutions, preparing students for data-driven careers where they will likely encounter other LexisNexis research solutions.

| **Lawyer** | **Media Analyst** | **Business Analyst** | **Data Scientist** |
| (Lexis+) | (Nexis Newsdesk) | (Nexis) | (Nexis Data as a Service APIs) |

Nexis Uni enables you to fulfill a key goal: Giving students the tools needed to learn by doing. Nexis Uni is an ideal platform for teaching students to think critically about media sources, data and statistics.

It is projected that nearly **70%** of employees will be expected to use data heavily in their jobs by **2025**.
